Education

Jaypee University of Engineering and Technology

August 2022 - May 2026

Computer Science Engineering(CGPA of 9.5)

Guna, India

Experience

Zo Labs

May 2025 – September 2025

Web Development Intern

- Built and deployed full-stack, vibe-driven marketing systems (React/Next.js, Node.js, Express, Typescript) and automated Meta Ad + social media campaigns using GPT-4, n8n, and tailored prompt engineering, cutting manual effort while boosting engagement by 60% through dynamic A/B-tested outreach..
- Designed AI-driven monitoring dashboards and automated flow logic to track campaign health, optimize outreach, and orchestrate scalable pipelines for social media, APIs, and ad management.

Projects

AI Chat with PDF | *Next.js, Shadcn, Pinecone, Langchain, LLM integration, Clerk, Firebase, Stripe* | [Link](#)

- Built an AI-powered SaaS application for document interaction, utilizing a full-stack architecture with Clerk, Firebase, and a Stripe payment gateway.
- Engineered a LangChain/Pinecone conversational AI backend that processes documents up to 10x faster than manual search, enabling rapid, accurate chat against uploaded PDFs.
- Developed a scalable monetization model with Stripe Checkout and webhooks to manage user subscriptions and grant tiered access based on plan.

Netflix Inspired Portfolio | *React.js, Node.js, Express.js, TailwindCSS, PostgreSQL, n8n, AI Automation* | [Link](#)

- Built a Netflix-inspired interactive portfolio leveraging prompt-engineered workflows and n8n automation to orchestrate backend integrations, dynamic content pipelines, and real-time API health checks.
- Delivered a fully responsive, AI-driven showcase with modal previews, automated inference flows (40% automation, 60% manual fixes), and hard-coded UI/UX powered by prompt-engineered GPT workflows (zero-shot, role prompts, and context chaining).

AI Interview Platform|*Next.js, TailwindCSS, ShadcnUI, Firebase, Vapi, n8n* | [Link](#)

- Engineered and launched a full-stack job interview platform built on Next.js/Firebase with a modern Shadcn/UI interface, processing 100+ interview sessions during beta testing.
- Integrated Vapi AI voice agents with the Google Gemini API to conduct and evaluate real-time mock interviews, cutting the feedback delivery time from hours to under 5 seconds.
- Developed a comprehensive, responsive dashboard for users to manage, track, and analyze interview performance metrics, improving user retention during testing by 15%.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML/CSS

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, TailwindCSS, LangChain, Pinecone

Tools: Git, Docker, Vercel, Render, Replit, PostgreSQL, Supabase, Firebase, n8n, Agentic AI, RAG Pipelines, LLM Integrations, Prompt Engineering, Vibe Coding, Marketing Automation

Achievements

- Winner National Hackathon:** HackOverflow, April 2024 [Link](#)
- Competitive Programming:** Solved 200+ problems on LeetCode.
- Organiser-** TEDxJUET
- National Service Scheme - Student Head**
- GFG Technical Club - Social Media Head**
- G20 National Seminar - Management and Content Writing Head**
