Education

Jaypee University of Engineering and Technology

August 2022 - May 2026

Computer Science Engineering(CGPA of 9.5)

Guna, India

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL, HTML/CSS

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems

Frameworks & Libraries: ReactJS, Node.js, Express, Next.js, Firebase, MongoDB

Tools: Git, Docker, n8n, Replit, Lovable, Cursor, Botpress, Instamojo, Meta Ad Manager.

Experience

Zo Labs

May 2025 – Present

Web Development Intern

- Engineered full-stack, vibe-driven marketing experiences using React, Node.js, HTML/CSS, and WordPress, integrating Instamojo, Meta Ads, and A/B testing to boost engagement by 40
- Built AI agents and LLM-powered workflows using GPT-4 and n8n; automated social outreach, simulated event-based flows, and integrated third-party APIs + cloud storage to reduce manual ops.

Projects

Trip Planner| React Js, Node Js, Firebase, PostgreSQL | [Link](#)

- Implemented dynamic filtering and real-time user interaction logic using React and Node.js, simulating event-driven data flow and scalable architecture principles.
- Built a full-stack travel planner with curated recommendations for destinations, food, and lodging.
- Integrated monthly suggestions and third-party booking redirects to enhance UX.
- Designed an admin panel with secure login and role-based listing management.
- Achieved a clean UI using responsive design principles to increase engagement.

Farmfolio:Crop Recommendation, News, Weather Updates | *Html, CSS, JS, NodeJS, Express, Botpress* | [Link](#)

- Integrated real-time weather and government scheme APIs to deliver live data updates, using modular backend logic and automation flows that mimic streaming pipelines.
- Developed an agriculture-focused web app offering personalized crop and fertilizer suggestions.
- Integrated weather APIs and government scheme modules for real-time updates.
- Built a multilingual chatbot using Botpress with personality agents for rural user accessibility.
- Designed a farmer-friendly UI and mobile-first experience.

InBetaByPriya: A NETFLIX style portfolio | *React.js, Node.js, Express.js, Tailwind, PostgreSQL, Vibe Coding* | [Link](#)

- Interactive project carousel with modal previews, smooth scroll, and framer-motion animations in a dark Netflix-inspired UI.
- Fully responsive design across mobile, tablet, and desktop with custom Tailwind components and adaptive layouts.
- Built-in AI automation workflows using GPT-4 and n8n for content generation, with backend keep-alive and API health checks for 24/7 uptime.

Achievements

- Winner National Hackathon:** HackOverflow, April 2024 [Link](#)
- Competitive Programming:** Solved 200+ problems on LeetCode.
- Organiser-** TEDxJUET
- National Service Scheme - Student Head**
- GFG Technical Club - Social Media Head**
- G20 National Seminar - Management and Content Writing Head**
